JEEVAA S V

Programmer | Web Developer | Designer

I am a motivated and personable student currently pursuing a Bachelor's degree in Computer Science at Vellore Institute of Technology. With a creative and practical approach to problem-solving, I am highly adaptable to new technologies and tools. I am committed to achieving academic excellence and am eager to gain hands-on experience in the field of computer science.

Experience

2021 - 2022
Zero waste management club , VIT Vellore
Design head

As a core member of the Zero Waste Management Club at VIT Vellore, I led a team of 60+ members to implement sustainability programs on campus, in collaboration with other groups though raised awareness and organized marketing materials for events. I organized events and presentations, demonstrated strong project management and leadership skills in achieving goals and fostered a sense of community among members.

2022
Scavenger's quest , Gravitas'22
Event co-ordinator

As the Event Coordinator for Scavenger Quest at Gravitas 22, a national technical symposium held at VIT Vellore, I played a key role in the organization and execution of the event. My responsibilities include overseeing registration, coordinating drop-ins with team members and volunteers, and creating promotional materials for participants to the sky. The event was a success, and I received positive feedback from both participants and organizer

2023 , July
Accepire
Frontend web developer

During my internship at Accepire, I served as a Front-End Web Developer, actively contributing to the creation of the company's website. I collaborated with the team to design and develop a visually appealing and user-friendly website that effectively showcased the company's products and services.I implemented responsive design principles to ensure optimal performance across different devices. Through this experience, I gained valuable hands-on experience in web development and contributed to enhancing the online presence of Accepire. (https://accepire.com/)

Projects

Data structure project : Heap based parking spot finder
https://github.com/jeevsssss/carparking/tree/main/dop/parking_space_finder
